DETAILED ACTION

- This action is responsive to the following communication: Amendment after Final filed on 9/5/06.
- Certified translation of foreign priority application (JP 2000-018337) has been acknowledged and entered.

Response to Arguments

Applicant's arguments, see page 2, filed on 9/5/06, with respect to foreign priority date has been fully considered and are persuasive. The rejection of claims 1-97 has been withdrawn. Certified translation of Japanese priority document (JP 2000-018337) is perfected, and herein invalidates the cited prior art of record (JP 2000-206836).

Allowable Subject Matter

Claims 1-97 are allowed.

The following is an examiner's statement of reasons for allowance: The cited prior arts of record fail to teach and/or suggest a control means for prohibiting a reception of the user request via said user interface unit in a case where the same-sized output media are not stored in the plural image output devices, and permitting the reception of the user request via said user interface unit in a case where the same-sized output media are stored in the plural image output devices, wherein said control means causes the plural image output devices to execute the outputting operation for the cascade outputting mode after permitting the reception of the user request and accepting the user request via said user interface unit. and in combinations of other features as cited in independent claims 1, 8, 15, 16, 22, 28, 35, 42, 52, 59, 66, 74, 82. The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of prior arts that teaches the above limitations and in combinations of other features cited in claims 1, 8, 15, 16, 22, 28, 35, 42, 52, 59, 66, 74, 82.
